

## 2026 NEBCA Calendar Call Out for Photographs and Drawings!

It is time to ask for photographs and drawings to be considered for the 2026 NEBCA calendar. Photographs can be black and white or color (we can convert to black and white). The cover photograph will be in color but all others will be in black and white. Please submit High Resolution Images (e.g. 300 DPI at 6"x9"), landscape not portrait, and the focus clear and sharp with good contrast. Images should be of working dogs with or without livestock and be visually interesting. Photographs from all seasons would be great. All submissions should include the dog's, owner's, and photographer's names as well as the submitter's contact information in case we have any questions. Please only submit photographs that you have permission from the photographer to use.

Also, for those of you who are artists, we would love some small drawings to put throughout the calendar. Drawings on the back cover will be in color but those in the rest of the calendar will be in black and white. We had some fabulous drawings for the 2025 calendar; they add so much to the whole product.

All submissions for photographs and drawings must be received by February 15, 2025. Please email submissions to: [NEBCACalendar@gmail.com](mailto:NEBCACalendar@gmail.com) Any questions can be sent there, as well. Thank you.
